Designated Agent must have a written statement from landowner authorizing him/her to secure a permit in the landowner's name.

SOIL EROSION AND SEDIMENTATION CONTROL PERMIT

APPLICATION CHECK LIST

The following information must be included for your application to be complete:

- 1 Set of Plans/ Hard Copy
- 1 Set of Plans/ Computer Copy
- Name and phone number of certified storm water operator
- Location of Property
- Building Site
- Size of Earth Change
- Location of Body of Water
- Distance from Work Site to Body of Water
- Temporary Control Measures
- Permanent Control Measures
- Vegetative Measures
- Wetlands
- Sewage System
- Predominant Land Features Such as Lakes, Streams, Steep Banks, Berms, etc
- Slope Degree & Description & Direction of Drainage Flows
- Soil Type
- Proposed Use
- Date Project to Start
- Date Project to Be Finished
- Timing and Sequence of Each Proposed Earth Change

SOIL EROSION CONTROL NOTES

Please retain this copy of Soil Erosion Control Notes for your records.
They will remain in affect until we finalize the project.

PLEASE CALL FOR A FINAL INSPECTION
989-831-7322

1. All soil erosion and sedimentation control (SESC) measures shall be constructed prior to commencement of construction activity and maintained in accordance with the Montcalm County SESC Permit.
2. Daily Inspections shall be made by the contractor to determine effectiveness of SESC measures and any necessary repairs shall be performed without delay. Daily inspection sheets signed by the certified storm operator shall be emailed to dcooper@co.montcalm.mi.us or mailed to the Montcalm County Drain Commission on a monthly basis.
3. Any erosion or sediment from work on this site shall be contained on the site and not be allowed to collect on any off-site areas, or in waterways; waterways include both natural and manmade open ditches, streams, storm drains, lakes, and ponds.
4. Contractor shall apply temporary SESC measures as required, as directed on your plans and remove temporary measures as soon as permanent stabilization of slopes, ditches, and other earth changes have been established.
5. A minimum 75' long by 20' wide, 12" deep clean stone exit shall be provided at all construction entrances. Should the stone become less efficient, it shall be replaced. All construction traffic will use the clean stone exits.
6. Dust control within the project will be exercised at all times by the contractors. Sprinkling tank trucks shall be available at all times to be used on haul routes or other places where dust becomes a problem.
7. All mud, dirt, and debris tracked onto existing roads shall be promptly removed by the contractor on a daily basis or more frequently as required. All mud, dirt, and debris tracked or spilled onto paved surfaces within this site shall be promptly removed by the contractor.
8. After each rainfall event, contractor to inspect and maintain all SESC measures with emphasis on replacing catch basin filters and repairing silt fence.
9. Place filter fence behind curb wherever sheet, or concentrated flows may convey soil over the curb.
