

MONTCALM COUNTY

EMERGENCY MEDICAL TECHNICIAN

General Summary

Under the direction of an Emergency Medical Services Supervisor, responds to requests for emergency medical services as part of an ambulance crew. Operates emergency medical equipment, providing immediate treatment to victims to alleviate symptoms or suffering. Monitors vital signs and stabilizes emergency patients prior to reaching definitive medical care. Maintains radio contact with medical facility to provide victim information and receive guidance and direction. Performs functions requiring an EMT license.

Essential Functions

1. Responds to emergency medical calls to render assistance and transports victims to a medical facility. Maintains radio contact with medical facility staff during EMS runs to provide victim information and receive medical guidance and direction.
2. Identifies the injury, illness or condition and renders appropriate medical care to alleviate symptoms or suffering and stabilizes emergency patients prior to reaching medical facility.
3. Utilizes airway equipment to establish and maintain an airway where necessary. Monitors patient's breathing with a stethoscope.
4. Assesses the level of consciousness of a patient, monitors blood pressure and pulse, and monitors the heart rate, rhythm and strength. Determines adequacy of patient's circulation.
5. Inspects pupils and determines if they are reactive, equal, dilated, constricted and accommodating. Inspects to determine whether patient wears contact lens or eyeglasses.
6. Determines patient's oral or axillary body temperature utilizing an oral thermometer. Inspects patient's body surface to determine abnormal color, deformity, symmetry, swelling, wounds, fluids or foreign substances/materials.
7. Assists patients with external wounds to control bleeding by applying direct pressure, elevating extremity, applying tourniquet, and dressing and bandaging the wound.

8. Examines patients and identifies signs and symptoms of internal bleeding, open or closed abdominal injury or shock and renders emergency care.
9. Identifies and treats patients with signs and symptoms of hyperthermia, hypothermia, frost bite, heat stroke, heat exhaustion, heat cramps, and conditions resulting from skin or scuba diving accidents with emergency care and treatment.
10. Identifies and treats traumatic injuries such as fractures, dislocations, soft tissue injury, sucking chest wound, burn, shock and other conditions with appropriate life support medical treatment.
11. Identifies medical conditions from written or verbal description and selects appropriate medical life support treatment.
12. Transmits patient's vital signs and condition and receives direction from medical facility personnel by radio. Provides treatment and care within licensing restrictions and personal abilities.
13. Transports individuals under emergency and non-emergency conditions.
14. Maintains records and prepares reports of activities.
15. Attends seminars, workshops, continuing education courses and in-house training sessions to maintain licensure and remain current on the latest methods, techniques and procedures regarding emergency medical services.
16. Inspects and maintains emergency equipment and vehicle to ensure proper operating condition. Maintains inventory of medical supplies on vehicle and replenishes as necessary. Disinfects units after runs.
17. Instructs various groups in basic first aid technique and cardiopulmonary resuscitation, conducts blood pressure clinics, and gives presentations on EMS services and tours of facilities.

Other Functions

18. Performs housekeeping and maintenance tasks at base facility and grounds, including cleaning the base, laundering linens, and washing and cleaning ambulances.
19. Assists with various community functions as a representative of the department.

This list may not be inclusive of the total scope of job functions to be performed. Duties and responsibilities may be added, deleted or modified at any time.
